INDEX

- **Introduction**
- **Objective**
- **Overview of System**
- **Methodology**
- **Modules for Online Job Portal**
- **Benefits**
- **Results**

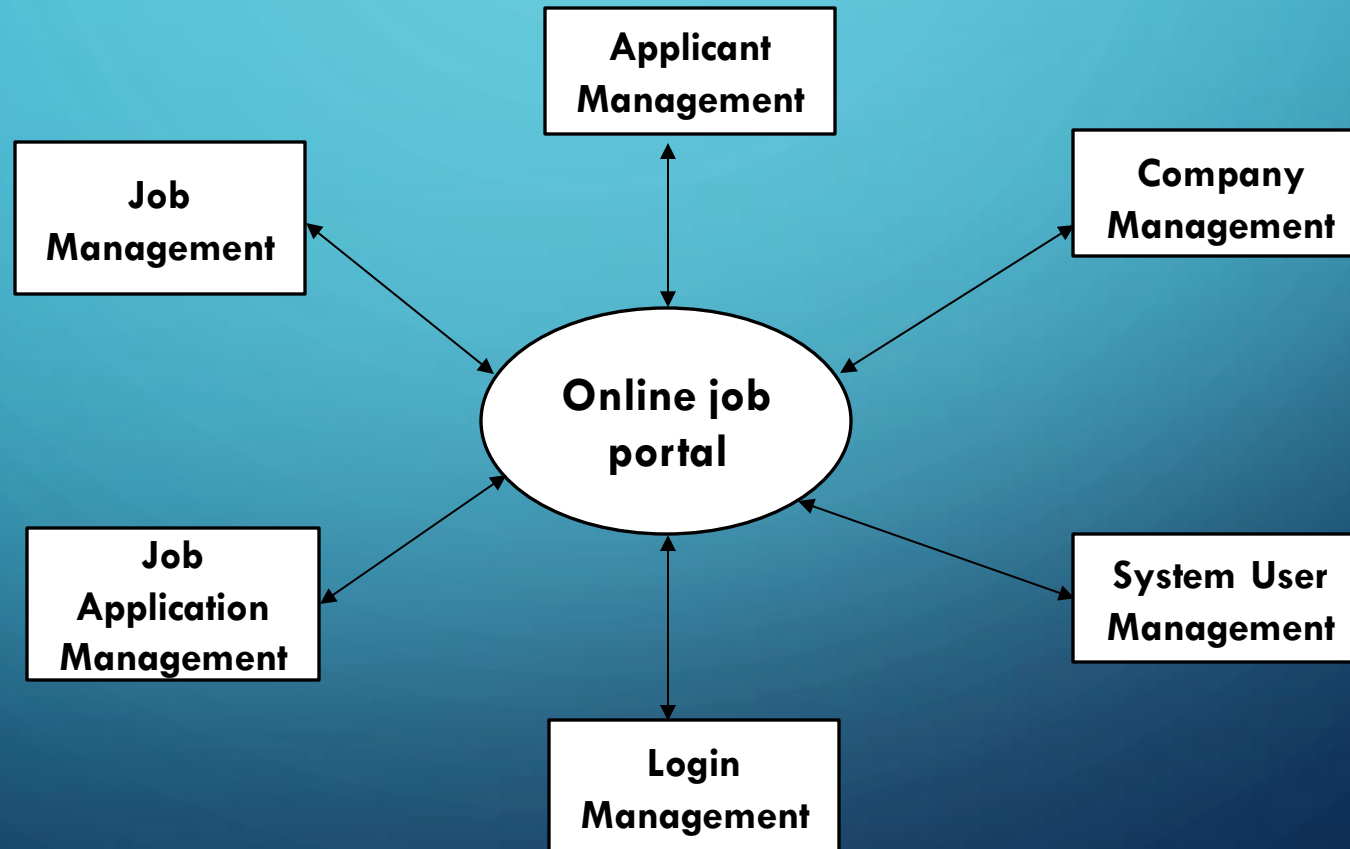

INTRODUCTION

- The "Online Job Portal" has been developed to override the problems prevailing in the practicing manual system.
- This software is supported to eliminate and in some cases reduce the hardships faced by this existing system.
- Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.
- Online Job Portal, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping.

OBJECTIVE

- The main objective of the Project on Online Job Portal is to manage the details of Job, Vacancy, Resume, Interview.
- It manages all the information about Job, Call Later, Interview, Job. The project is totally built at administrative end and thus only the administrator is guaranteed the access.
- The purpose of the project is to build an application program to reduce the manual work for managing the Job, Vacancy, Call Later, Resume. It tracks all the details about the Resume, Interview.

OVERVIEW OF SYSTEM

Modules of Online Job Portal

- Job Management Module: Used for managing the Job details.
- **Dashboard Module**: Used for managing the company details.
- Vacancy Management Module: Used for managing the information and the Vacancy.
- Resume Module: Used for managing the Resume details Module
- Login Module: Used for managing the login details
- Users Module: Used for managing the users of the system

METHODOLOGY

- Online job portal project is implemented in PHP using HTML, Xampp server , CSS and MySQL. Main aim of Online job portal project is to develop a online web portal ,which helps the user to search jobs according to his interest and can apply if interested.

This application consists of two modules admin module, user module:

- **Admin module:** This module allows adding, deleting and modifying of new jobs available .Admin can add city, stream, and more details about jobs. Admin also can view the list of candidates those have applied for jobs and can add important news for candidates. Admin can change his password.
- **User Module:** Users should register themselves, they can login using their email and password. Then they can search job according to their interest .

BENEFITS

- One of The Most Cost-Effective and Affordable Solutions
- Regular Job Updates
- Notification On New Jobs or Job Alerts
- Classified
- Resourceful

RESULTS

- This portal act as a communication bridge between applicants and recruiters facilitating their requirements.
- This is online web portal that include registration and login of candidates ,their resume ,information and vacancies of company
- One can easily access all information regarding job vacancies, companies and applicant.
- It provides user friendly interface which facilitates in reaching wide range of audience.
